LETTER OF RECOMMENDATION

To Whom It May Concern,

I am Santosh Bannur, General Manager – Operations Quality at Tata Motors Passenger Vehicles Limited, and I am pleased to recommend Mr. Adabala Sai Pranav. During his tenure with our Body-in-White (BIW) quality team, I had the opportunity to supervise his work closely and observe his technical capabilities, analytical mindset, and commitment to quality improvement in a demanding automotive manufacturing environment.

Mr. Sai Pranav played an active role in Body-in-White dimensional inspection activities and supported quality assurance for laser brazing operations. He also contributed to the development of Process Failure Mode and Effects Analysis (PFMEA) for the Tata Punch Electric Vehicle program, assisting in identifying potential failure modes and supporting preventive quality measures within the production process.

One of his most notable contributions was identifying the root cause of a recurring production defect related to a part mix-up in an assembly fixture. After analysing the process flow and potential failure modes, he proposed and implemented a capacitive sensor-based poka-yoke solution that prevented incorrect component loading. This improvement eliminated the defect occurrence and significantly improved the robustness of the assembly process.

Sai Pranav consistently demonstrated strong problem-solving abilities and a practical approach to engineering challenges. He showed particular interest in applying analytical methods and automation to improve manufacturing quality and inspection efficiency. His curiosity toward new technologies and his ability to quickly learn and apply technical concepts made him a valuable member of our team.

In addition to his technical strengths, Sai Pranav worked effectively with cross-functional teams on the shop floor, coordinating with inspectors, operators, and engineers to support quality initiatives. His professionalism, reliability, and collaborative attitude contributed positively to the team environment.

I strongly believe that Mr. Adabala Sai Pranav will continue to excel in engineering and quality-related roles. I highly recommend him for opportunities in advanced engineering, manufacturing, or quality management.

Sincerely,
Santosh Bannur
